Vance Industries, Inc *EZ Slide 'n Stor* Product Line

Bensenville, IL (February 2007) – Vance Industries, Inc has announced a new product line *EZ Slide 'n Stor*. This new line of products addresses the ever increasing need to store more items in your kitchen while reducing clutter. The *EZ Slide 'n Stor* products utilize the previously unused space just below a shelf or at the very top of a cabinet through an easy to install and virtually invisible rail system.

The initial product lineup:

1. Med Center

This Medication organizer has storage bins that are sized to fit the most popular medication bottles. It is designed to slide on clear acrylic rails that easily mount to the underside of wall cabinet shelves. This allows the product to utilize otherwise unused space in the wall cabinet. It slides out easily so you can set it on your counter while accessing the contents. This feature allows one or more to be mounted under even the highest shelf because you remove it for use then simply slide it back in when done.

2. Med Manager

This medication organizer has storage bins that are sized to fit the most popular medication bottles and in addition has two rows of 7 (one week for two people) medication dispensing wells. Like the Med Center above, this product slides on clear acrylic rails that mount to the otherwise unused underside of a wall cabinet shelf. It is designed to be fully removed for use then simply slides back in when done. If mounted under a lower shelf, the organizer can be slid halfway out thereby exposing the dispensing wells without full removal

3. Stuff Organizer

This general purpose organization tray has storage bins that will hold many different items in your kitchen, bar, bath, or office. It is designed for installation at the top of the base cabinet opening thereby using otherwise unused space. It slides on adjustable steel rails that mount to the front and back or sides of the cabinet frame.

4. Poly Breadboard

This product takes the Vance restaurant grade high density Polyethylene breadboard to a new level of convenience. Using adjustable steel rails, you mount this breadboard at the top of the base cabinet opening using otherwise unused space. The breadboard is then ready at hand when needed. When done, simply slide it back into the rails for convenient nearly invisible storage.

5. Wood Breadboard

This product takes the Vance hardwood, superior quality breadboards to a new level of convenience. Using adjustable steel rails, you mount this breadboard at the top of the base cabinet opening using otherwise unused space. The breadboard is then ready at hand when needed. When done, simply slide it back into the rails for convenient nearly invisible storage.

Vance Industries, Inc is taking orders now for the *EZ Slide 'n Stor* products. The new products will begin shipping spring 2007.
