The Vanseal Sink Installation Clamp

The Vanseal Sink Clamp is designed to hold a sink securely in place while mounting hardware is added and silicone sealant sets. The clamp can easily be removed either in the shop or at the job site after the adhesives have set.

The sturdy aluminum I-beam and the threaded $\frac{1}{4}$ " steel rod are capable of handling the most challenging undermounting requirements.

The spin clamps measure $2\frac{1}{2}$ " and 5" which allows for use with drains from $1\frac{1}{2}$ " to $3\frac{1}{2}$ " and can be tightened from top or bottom.

The horizontal bar and the spin clamps are coated with a rubberized material to prevent slippage while tightening the clamp.

Clamps are re-usable. Two clamps are recommended for double bowl sink installations.
